SUMMARY

Business Intelligence Analyst with 6+ years of experience designing and developing scalable data pipelines, system integrations, and analytics solutions across enterprise environments. Skilled in SQL, Python, ETL/ELT frameworks, Snowflake, Oracle ADW, and Power BI to consolidate data and deliver interactive dashboards that improve decision-making. Improved query latency by 40% and reduced reporting platform overhead by 30%, driving more reliable insights for leadership.

WORK EXPERIENCE

Oracle US

May 2024 - Apr 2026

Business Intelligence Analyst

- Built scalable analytics data models & pipelines by consolidating 10+ TB from Snowflake & Sybase into Oracle ADW, creating a governed source of truth for GTM analysis, sales planning, performance tracking, & leadership reporting reducing query latency by 40%, positively impacting annual revenue growth.
- Modernized 50+ Tableau & Power BI dashboards into Oracle Analytics Cloud, improving executive reporting, KPI visibility, revenue performance analysis, & self-service decision-making for 1,000+ users while reducing platform maintenance overhead by 30% and prototyping Power Apps interfaces to extend analytics to field teams.
- Developed automated data quality & monitoring frameworks across SQL, ODI, PySpark, & Databricks pipelines, improving trust in planning dashboards, revenue reports, & business performance metrics by reducing production data defects by 70% & sustaining 99.9% data accuracy.

Verra Mobility US

Feb 2022 - May 2024

Business Intelligence Analyst

- Built & maintained SQL-driven reporting layers with DAX measures supporting 20+ Power BI & SSRS dashboards for sales planning, operational performance analysis, KPI tracking, & business decision support, serving 500+ daily users & improving latency by 35%.
- Developed predictive analytics models across 10M+ records to support forecasting, capacity planning, performance analysis, & proactive business decision-making, reducing operational exceptions by 18% & improving accuracy by 20%+.
- Applied Python-based predictive analytics & AI-assisted scripting to automate data preparation, improve forecasting workflows, & surface operational insights faster for business stakeholders.

Oracle US

Jun 2022 - Aug 2022

Analytics Consultant Intern

- Implemented the Enterprise Analytics Accelerator Lab on Oracle Analytics Cloud using agile project management to create reusable dashboard & reporting templates across 3–5 enterprise use cases, scaling analytics productivity & reducing development time by 30%.
- Migrated 5M+ records into Oracle Autonomous Data Warehouse using SQL Developer, Data Pump, and code repositories with version control, achieving 100% data integrity validation & improving query performance by 25–35% for downstream reporting & business analysis.
- Migrated 23% of on-premises semantic assets to Oracle Analytics Cloud, enabling secure, governed access to 100+ downstream reports & dashboards used for business performance tracking, executive briefings, & decision support.

India

Aug 2018 - Sep 2021

Data Analyst

- Anzy: Revamped SQL & Tableau-based data management & reporting workflows using software development tools, reducing data redundancy by 38% & improving visibility into finance, delivery, & business performance metrics.
- Wizikey: Conducted market, media, & sentiment analysis using Python & NLP across EdTech, Consumer Internet, FinTech, & VC sectors; developed industry intelligence reports reducing customer churn by 38% & increased user traffic by 42%.
- ARM Infoserve: Performed customer, product, & churn analysis using SQL & Neo4J graph queries across 1M+ records, identifying revenue & retention opportunities that contributed to 24% revenue growth, 13% higher customer retention, & 15–20% improvement in operational & product KPIs.

EDUCATION

Boston University

Sep 2021 - Jan 2023

Master of Science, Computer Information Systems

Boston, MA

- GPA: 3.8

Amity School of Engineering & Technology

Aug 2018

Bachelor in Technology, Mechanical & Automation Engineering

India

- GPA: 3.5

SKILLS

- **Technical Skills:** SQL, Python, Excel, Power Query, Power BI, Tableau, Oracle Analytics Cloud, Snowflake, BigQuery, Oracle ADW, dbt, ETL/ELT Pipelines, Data Modeling, Data Quality Frameworks, AI-Assisted Analytics, Neo4J, C#, ASP.NET, React, Javascript, Databricks, Microsoft Power Apps, DAX, Data Integration, Code Repositories, Version Control, Software Development Tools
- **Business & Strategic Analysis:** Business Analysis, Strategic Planning Support, Sales & Revenue Planning, Financial Modeling, KPI Development, Market & Competitive Intelligence, Territory & Account Analysis, Performance Analysis, Executive Reporting, Data Storytelling, Cross-Functional Stakeholder Collaboration, Process Automation, Agile Project Management
- **Certifications:** Microsoft Power BI Analytics, Oracle Cloud, Oracle Analytics, Oracle APEX
